## RIIWHS204D Work safely at heights

### COURSE OVERVIEW

Working at heights awareness training will give participants an understanding and knowledge of the dangers of working at heights, controls that should be applied to reduce the risks associated with working at heights as well as an understanding of the legislation surrounding working at heights.

Training for working at heights is a high risk occupation and one that requires specific training around awareness and management – governed by OHS and WHS compliance. When workers need to work at heights it is imperative that they are competent to minimise risks to themselves personally. Your business also has a duty of care and legal responsibility to ensure that staff are adequately trained around the risks involved.
